

Section 1 – Conflict Minerals Disclosure

Item 1.01 and 1.02 Conflict Minerals Disclosure and Report; Exhibit

A copy of Quantum Corporation's Conflict Minerals report is provided as Exhibit 1.01 to this Form SD and is available at the following address:
<http://investors.quantum.com/phoenix.zhtml?c=69905&p=irol-governance>.

Section 2 – Exhibits

Item 2.01 Exhibits

The following is filed as an exhibit to this Form SD.

Exhibit 1.01 -- Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

QUANTUM CORPORATION

Interim General Counsel

Date: May 31, 2019

Exhibit 1.01

Quantum Corporation

Conflict Minerals Report For the Calendar Year Ended December 31, 2018

This Conflict Minerals Report contains forward-looking statements. These statements include statements regarding Quantum's goals for its Conflict Minerals policy and the actions that Quantum intends to take to improve transparency and reporting. All forward-looking statements involve risk and uncertainty. When considering these statements, you should also consider the important factors described in reports and documents Quantum files from time to time with the Securities and Exchange Commission, including the factors described under the sections titled "Risk Factors" in Quantum's most recently filed Annual and Quarterly Reports on Forms 10-K and 10-Q, respectively. Except as required by law, Quantum disclaims any obligation to update information contained in these forward-looking statements whether as a result of new information, future events, or otherwise.

Introduction

This is the conflict minerals report for Quantum Corporation ("Quantum," "we," "us," or the "Company") for the calendar year 2018 in accordance with Rule 13p-1 under the Securities Exchange Act ("Rule 13p-1").

The proven industry leader in storing and managing video content for more than a decade, we deliver the industry's top streaming performance for video and rich media applications, along with the lowest cost, highest density cold storage solutions for cloud infrastructures. It's why businesses in post-production, broadcast, corporate video, sports video, autonomous vehicle design, the defense department, cloud services and more have made Quantum the # 1 choice for the most demanding rich media workflows. More information about Quantum's product suite is available at <http://www.quantum.com/en/products/>.

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the rules promulgated thereunder ("Section 1502") requires Quantum to perform certain due diligence procedures and disclose information about the use and origin of certain minerals if these minerals are deemed to be necessary to the functionality or production of a product manufactured or contracted to be manufactured by the Company. The specific minerals covered by these rules are tin, tantalum, tungsten, and gold ("Conflict Minerals" or "3TG"). The Quantum products that contain 3TG are its hardware products (storage systems and subsystems) that the Company contracts to manufacture and sells directly or through resellers, and Conflict Minerals are necessary to their functionality or production.

Components and subassemblies that include 3TG are sourced from a global supply base that includes distributors, value-added resellers, original equipment manufacturers, original design manufacturers and contract manufacturers. Accordingly, Quantum must rely on its direct material suppliers and other third parties to provide information on their upstream 3TG sourcing facilities and processes.

In accordance with Section 1502 and Rule 13p-1, Quantum has performed a reasonable country of origin inquiry ("RCOI") into the 3TG that were in the Company's supply chain for calendar year 2018 in order to determine whether these minerals may have been sourced from the Democratic Republic of the Congo or adjoining countries "Covered Countries") and has conducted due diligence measures as described below.

Due Diligence Procedures

During calendar year 2018, Quantum undertook due diligence procedures to determine the source and chain of custody of the 3TG used in its products. Quantum's 3TG due diligence measures were designed to conform, in all material respects, with the framework described in the Organisation for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition (OECD 2016) ("OECD Guidance") and any related supplements. Specifically, the Company's 3TG due diligence measures included the following steps:

1. Establishing strong company management systems;
2. Identifying and assessing risk in the supply chain;
3. Managing supply chain risks;
4. Supporting industry organizations that carry out independent third-party audits of smelter and refiner due diligence practices; and
5. Publicly reporting on due diligence.

Establish strong company management systems

1. We have established and committed to a company statement regarding our responsibility for addressing Conflict Minerals in our supply chain. A copy of our Conflict Minerals Policy can be viewed at <https://www.quantum.com/en/ethicsandcompliance/>. In addition, Quantum contractually requires compliance with the Responsible Business Alliance Code of Conduct, Conflict Minerals, and Environmental Requirements Specification in our supplier and purchase order terms and conditions and in our supplier code of conduct.
2. Our internal Conflict Minerals processes are led by our legal department, with assistance from the Company's supply chain and engineering teams. Senior management is routinely updated on the status of Quantum's Conflict Minerals compliance efforts.
3. As we do not have a direct relationship with the 3TG smelters and refiners, we engage and with other major manufacturers in our industry and take advantage of third-party industry resources including the Responsible Business Alliance's Responsible Minerals Initiative ("RMI") (of which Quantum is a member) to gather information and influence supply chain practices. We also utilize the services of Assent Compliance to help us gather, analyze, and address Conflict Minerals data and compliance status.
4. We have multiple longstanding grievance mechanisms whereby employees and suppliers can report violations of Quantum's policies, including reports to our ethics committee and our third-party hotline. Information about these mechanisms is available in our Code of Conduct, which is posted on the investor relations section of our website.
5. We have adopted a policy to retain documentation relevant to our conflict minerals due diligence and reporting.

Identify and assess risk in the supply chain

1. We participate in the industry-wide RMI to evaluate and disclose upstream actors in the supply chain. As part of our risk assessment plan and to ensure suppliers understand our expectations, we provide feedback, either directly or through our relationship with Assent Compliance, to applicable suppliers regarding reporting that we believe is incomplete, inaccurate or may indicate smelters in their supply chain that do not show progress towards a conflict free supply chain.
 2. For consistency of data content and formatting, Quantum requests our suppliers complete a current version of the RMI conflict minerals reporting template ("CMRT"). We have determined that this process represents the most reasonable effort to determine the mines or locations of origin of the 3TG in our supply chain. Our focus has been on obtaining CMRTs from the suppliers who, in the aggregate, account for at least 80% of our annual direct supplier purchase expenditures. While not all suppliers provided the requested CMRT data, given the volume of smelters and refiners that were identified by other suppliers, it is unlikely that a 100% response rate would have identified additional valid smelter or refiner locations.
-

3. Risk is assessed by reviewing information contained in the declaration tab of each supplier's CMRT and by comparing the CMRT data against the RMI smelter and refiner list. In CY18, Quantum utilized the services of Assent Compliance, a third-party resource for data gathering and analysis and subsequent aggregation of declarations and consolidated smelter reports. These summary reports help identify risks associated with smelters in our supply chain that may require mitigation.

Manage Supply Chain Risks

1. Quantum has an enterprise risk management plan through which the Conflict Minerals program is implemented, managed and monitored. Updates regarding the risk assessment with respect to 3TG/Conflict Minerals and their usage in the supply chain are provided routinely to senior management.
2. Quantum suppliers and contract manufacturers are contractually obligated to comply with our Environmental Requirements Specification, including by providing CMRTs and supporting a conflict-free supply chain. Assent Compliance was used to identify and evaluate smelter and refiner data included on CMRTs against the RMI database. Corrections were requested from suppliers for any data inconsistencies or inaccuracies identified during that process.
3. We request data from suppliers whom we have reason to believe (based on part type and material) may be supplying us with 3TG, with the focus being suppliers who represent the top 80% of material purchase spend. Suppliers providing CMRT information that suggests their supply chains may support conflict in the Covered Countries are encouraged to establish an alternative source of 3TG that does not support such conflict, as provided in the OECD guidance. Requirements to comply with Conflict Minerals reporting and conflict free sourcing efforts are included in Quantum's supplier agreements, purchase order terms and conditions, and Environmental Requirements Specification.
4. Some of our suppliers were unable to represent to us that 3TG from the entities they listed had actually been included in components they supplied to Quantum. In addition, some identified processing facilities were not validated as being verified smelters or refiners. We have therefore elected to present only the smelter and refiner names identified by the RMI in this report (Table 1). Of those smelters that have been identified, 88% have been found to be RMI compliant or active. Quantum will continue to encourage suppliers to utilize only compliant smelters. Table 2 lists the countries where the 3TG originated, based on RMI data.

Support industry organizations that carry out independent third-party audits of smelter and refiner due diligence practices

We do not have a direct relationship with 3TG smelters and refiners and do not ourselves perform or direct audits of the due diligence practices of these entities within our supply chain. However, we support audits through our participation in various industry initiatives. Quantum is a member of the RMI and compares supplier smelter and refiner data with RMI lists as described above. Quantum considers smelters and refiners identified by the RMI as conformant to be conflict-free.

Publicly report on due diligence

A copy of Quantum Corporation's Conflict Minerals report is provided as Exhibit 1.01 to this Form SD and is available at the following address: <http://investors.quantum.com/phoenix.zhtml?c=69905&p=irol-governance>.

Results of Due Diligence

Based on the information available to the Company via industry sources and the due diligence processes described above, Quantum believes that some or all of the smelters and refiners listed in Table 1 may have provided some or all of the 3TG used in Quantum products in CY18. Quantum continues to have smelters in its supply chain that have not been identified by the RMI as conformant with its conflict-free audit process. We do not believe that the 3TG used in our products originated from recycled or scrap sources.

We continue to engage in ongoing work with our supply chain to only use smelters or refiners that are actively achieving or progressing toward RMI conflict-free status. We expect that over time, our due diligence efforts will incrementally improve and yield more complete information, particularly as suppliers improve the accuracy of their own data and more smelters and refiners participate in third-party audit process.

An independent private sector audit of our Conflict Minerals Report was not required for calendar year 2018.

Table 1. *Potential Smelters and Refiners Used.*

The information provided in the list below is an aggregation of data received from our supply chain and not a confirmation of 3TG Minerals contained in Quantum products. Since most of the identified smelters or refiners were disclosed at the company-level by our suppliers, we are unable to confirm which specific smelters or refiners actually supplied parts or components used in Quantum products. Therefore, there may be some smelters or refiners in the list below that do not relate directly to our products. Only the smelters or refiners whose names are recognized as smelters or refiners by the RMI are listed below.

Table 2. *Country of Origin Data*

The countries of origin of the 3TG Minerals processed by the smelters or refiners listed above may have included the countries identified below, based on information provided by the RMI to its members. Since most of the identified smelters or refiners were disclosed at the company-level by our suppliers, we are unable to confirm which specific smelters or refiners actually supplied parts or components used in Quantum products. Therefore, there may be countries of origin in the list below that do not relate directly to our products.

ANDORRA	JAPAN	SINGAPORE
AUSTRALIA	KAZAKHSTAN	SOUTH AFRICA
AUSTRIA	KOREA, REPUBLIC OF	SPAIN
BELGIUM	KYRGYZSTAN	SUDAN
BOLIVIA	LITHUANIA	SWEDEN
BRAZIL	MACEDONIA	SWITZERLAND
CANADA	MALAYSIA	TAIWAN, PROVINCE OF CHINA
CHILE	MEXICO	THAILAND
CHINA	MYANMAR	TURKEY
CZECH REPUBLIC	NETHERLANDS	UGANDA
